

Technology

We pride ourselves on staying at the cutting edge of technology.

The Southern Maryland Higher Education Center was established to provide state-of-the-art technology supported classrooms and meeting spaces for university and training programs in the Southern Maryland region. Teachers and students maximize instruction and learning by utilizing the high-tech environment and equipment that are the hallmarks of education at SMHEC.

Video Outlets & Networking Jacks- All meeting rooms, board rooms and conference rooms are outfitted with multiple, conveniently arranged power and video outlets and networking jacks.

High Speed Internet- We offer a wireless high speed internet connection.

Internet II- T-1 lines can handle advanced internet II compressed video.

Satellite- We are able to receive satellite signals for display in all rooms at the Center.

Multi-Media Presentations- There are computer workstations available for all meeting rooms. Conducting a high quality presentation is easy using the latest multi-media ceiling mounted laser projectors and large projection screens. Presenters have mobility using the wireless mouse and bring focus to presentations with laser pointers.

Videoconferencing- Our videoconferencing system was designed to provide the highest video communication performance available today.

Sound System- Our sound system accommodates up to 6 microphone channels. Use our sound board to control the volume of microphones, video clips and speakers.

NO CHARGE

Our Center can help make your presentations a success with the use of a variety of Media Equipment.
